Malenkov at Calder Hall-

Mar 27th. '56

Cumberland-- Continuing his tour of Britain's Power projects, Mr Malenkov, Russia's Minister of Power Stations, paid a visit to Calder Hall, our first atomic station which will be opened by the Queen next October.

Mr Malenkov was surprised to learn that the 15 million pound plant had been built in only three years, and ~~would~~ ^{will} produce 15 times as much power as the Russian Plant.
