Antarctic (continued) Only recently, at Cape Evans, members of a Geophysical Year expedition discovered a collection of stores - deposited by Captain Scott - for use on his return journey from the South Pole. Overcome by terrible blizzards, Captain Scott and his comrades died while striving to reach the stores. To-day, his son Peter, opens the

containers at the Tin Research Institute - where they're undergoing

technical examination. This whough the food was in parfect condition, and even storm matches (kept in a tin-plate box) could be lit at the first strike. AND matches (kept in a tin-plate box) could be lit at the first strike. AND matches (kept in a tin-plate box) could be lit at the first strike.
