Queen's Horse-

London-- Happy memories of the State Visit to Portugal were revived with the arrival of "Bussaco" at the Royal Stables at Buckingham Palace. This 8 year-old chestnut was <sup>the gift horse</sup> ~~given~~ <sup>A gift</sup> to the Queen ~~during her stay in~~ <sup>presented</sup> ~~last~~ February- with a copy of an eighteenth<sup>th</sup> century saddle and silver-decorated harness.

Comet-

Germany-- High on the Wendelstein Mountain in the Bavarian Alps, preparations ~~are going on~~ <sup>have been made</sup> to photograph the new Comet- discovered last autumn by the Belgian astronomers- Arend and Roland. ~~The comet~~ <sup>(SAID TO BE ABOUT 53 MILLION MILES FROM THE EARTH)</sup> has become a regular feature of the north-western sky at night- visible in Britain to the naked eye. It's the biggest heavenly body of its kind since Halley's comet appeared- 47 years ago.

Open-Air Academy-

London-- The call of the open air brought London's art colony from their studios to display their talent in the Victoria Embankment Gardens. This was the L.C.C.'s annual open air art show, and the artists proved there was no easy way to fame and fortune. Budding Van Dyck's and Picasso's of all ages offered their wares in this Gallery- ready to ~~explain~~ explain the finer points to the ~~uninitiated~~ <sup>uninitiated</sup>. Though the exact meaning of <sup>some of</sup> the exhibits was perhaps obscure, even second sight failed to fathom <sup>some of</sup> the impressionists' ~~point~~ of to-day.
