Visit to Dudley Zoo-

May 17th. '57.

A Midland centre with a growing attraction for young and old alike, is the Dudley Zoo- especially during the season of new arrivals! North African inmates, with the contented family outlook, are the Barbary sheep. While Mrs Wallaby long ago solved the problem of where to put Junior- to keep him out of mischief. This Zoo is growing, too, in another direction, for there are some 1100 animals, not including the many fish and reptiles. Feeding Time is always a popular highlight at Dudley- and a headache, too, for the Sea Lions alone gobble up 15 lbs of fish per day. With peacocks proudly preening their fine ~~giant~~ feathers- and a strong contingent of ~~these~~ amusing ^{PENGUINS} ~~birds from the Southern Hemisphere~~ Dudley Zoo is the very place to spend an instructive afternoon.
