

Air Drop

In the Antarctic, Operation "Deep Freeze" is on - the ferrying of supplies from the home base, at McMurdo Sound - to teams of Geophysical Year scientists - ranging over this five million square miles of Polar ice.. 11/0

This year, the Antarctic is so crowded that even the ~~paginas~~ penguins are getting used to birds that can fly.. 4/5

This air drop was made over the South Pole - precious food supplies that fall right into a natural refrigerator... 6/6

Malaya

In Malaya - Canadian scientists (under Dr. George Shaw) have become aerial prospectors - seeking mineral wealth in the dense jungles.

Their chief item of equipment is not a ¹⁰ bomb - but a magnetometer - so sensitive that it can detect minerals at long range...

14 Synchronised with two aerial cameras - the magnetometer is trailed over ~~the territory~~ the territory - while the cameras ^{make a film record} ~~film the exact~~ 26/5

~~identification~~
~~the magnetometer records mineral~~ - The magnetometer records mineral deposits on a graph - while the cameras plot their exact locality...

A mineral treasure-hunt from the air. 7/5

East Germany

East Germany: The full circle has turned. A legacy of German militarism marched in welcome - when Mr Khrushchev, the Soviet Communist leader, arrived in East Berlin.

There seemed little ^{public} enthusiasm for this official visit. Perhaps the people were remembering the brutal oppression following the uprising - four years ago.

17 One visitor, a Nigerian, revealed the complete breakdown of security arrangements, when he insisted upon handing Mr Khrushchev a letter of thanks.- He had just been granted permission to travel though the Soviet Union. 28/4
