British Car at Utah-

America-- Looking like a giant beetle, a four-cylinder B.M.C. racing car ~~XXXXXXXXXXXXXXXXXXXX~~ makes <sup>A TEST SPEED RUN</sup> a ~~test run~~ on the Bonneville Salt Flats at Utah.

~~And the special~~ <sup>The</sup> timing device shows that on a second run, the British speedster set up new ~~international records~~ international records-

~~Co-drivers~~ <sup>WERE</sup> England's Tom Wisdom and New York's David Ash

Biggest Wind Tunnel-

ALSO In America, (where they believe in doing things the big way)- there's the world's biggest wind tunnel- with huge air intakes and powerful ~~turbines~~ turbines. <sup>Through here</sup> By man-made gales, roaring up to 3000 m.p.h., tests can be made of ~~jet engines~~ jet engines under actual flying ~~conditions~~ conditions.

Guided Missiles-

<sup>ON SHOW</sup> Here at Bristol is the "Bloodhound"- the type of ground-to-air guided missile that will take over the future air defence of Britain.

~~Using a special controlling apparatus~~ <sup>The British uses</sup>

~~another formidable~~ <sup>Now - 002</sup> ~~Britain's~~ first completely-controllable rocket-engine- the deHavilland "Spectre".

Fuelled by hydrogen peroxide, it can push Britain's newest planes towards a speed of 2000 m.p.h.

When engined by the "Spectre", the <sup>The new S.R. 53 fighter</sup> ~~will~~ will be capable of reaching twice the speed of sound!

~~From Australia~~ From Australia come first pictures of an anti-tank guided weapon still on the secret list. Even its name is yet unknown.

The weapon is guided visually, and its accuracy is measured not in yards, or even feet-- but in inches!
