British Car at Utah-

America-- Looking like a giant beetle, a four-cylinder B.M.C. racing car ~~XXXXXXXXXXXXXXXXXXXX~~ makes ^{A TEST SPEED RUN} a ~~test run~~ on the Bonneville Salt Flats at Utah.

~~And the special~~ ^{The} timing device shows that on a second run, the British speedster set up new ~~international records~~ international records-

~~Co-drivers~~ ^{WERE} England's Tom Wisdom and New York's David Ash

Biggest Wind Tunnel-

ALSO In America, (where they believe in doing things the big way)- there's the world's largest wind tunnel- with huge air intakes and powerful ~~turbines~~ turbines. ^{Through here} By man-made gales, roaring up to 3000 m.p.h., tests can be made of ~~jet engines~~ jet engines under actual flying ~~conditions~~ conditions.

Guided Missiles-

^{ON SHOW} Here at Bristol is the "Bloodhound"- the type of ground-to-air guided missile that will take over the future air defence of Britain.

~~Using a special controlling apparatus~~ ^{The British uses} ~~another formidable~~ ~~rocket engine~~

^{Now - 002} first completely-controllable rocket-engine- the deHavilland "Spectre".

Fuelled by hydrogen peroxide, it can push Britain's newest planes towards a speed of 2000 m.p.h.

When engined by the ^{The new S.R. 53 fighter} "Spectre", the ~~fighter~~ will be capable of reaching twice the speed of sound!

~~From Australia~~ From Australia come first pictures of an anti-tank guided weapon still on the secret list. Even its name is yet unknown.

The weapon is guided visually, and its accuracy is measured not in yards, or even feet-- but in inches!
