

2475

Britain's mighty V-Bomber force is rapidly taking shape as the "Avro Vulcan" - the world's first four-jet delta bomber - joins the "Valiant" in squadron service.

Already, at Waddington R.A.F. Station, the first Vulcans are being serviced by highly-trained technicians. (.)

Selected air crews are attending ground school - where ^{there are} ~~the~~ lessons ~~include~~ ⁱⁿ the aircraft's Bristol Olympus turbo-jet engines - and the vital use of oxygen at top-ceiling altitudes. (.)

Once the ~~theoretical~~ theory is mastered - they graduate to the "Flight Simulator" - preparing for their first flying instruction.

The first to be equipped is No. 83 Squadron - but next year, the famous "Dam-Buster" squadron is being reformed - to fly Vulcans... /

Meanwhile, the air-crews are mastering the ~~highly skilled~~ task of flying a ^{what is} ~~"Vulcan"~~ - believed to be the world's fastest operational bomber. /

With a greater hitting power than all the seven-thousand last-war Lancasters combined - the Vulcan is the worthy spear-head of Britain's V-Bomber Force. /
