Susan Beaumont

London: A day off from filming at Pinewood Studios for twenty-one year old Susan Beaumont to keep a very important date. She was marrying Mr Arthur Solomon (principal dancer in a London revue) at Hampstead Register Office.

In the world of films - the Bride has achieved a place in the sun - but right now she's hoping for rain - then she won't have to spend a working honeymoon - on location.

Aircraft carrier~~Science comes to the aid of Navy flyers~~

America: Science comes to the aid of Navy flyers - as a ~~carrier jet~~ jet fighter is catapulted off the ~~U.S.S. Antietam~~ a carrier - to test a new all-weather automatic landing system.

The plane (coming in to land) is picked up by a radar beam between two to four miles away. Then radio-impulses guide an automatic pilot inside the aircraft.

The course and height is checked - and even in thick fog, the aircraft can make a perfect landing on the flight deck...while the ~~man~~ pilot proudly says "Look, No Hands!"

King Haakon

Britain mourns the passing of a staunch friend - King Haakon of Norway, who has died at the age of eighty-five.

Our pictures show Europe's oldest Monarch being warmly welcomed by our own Royal Family during his State visit in 1951.

Four years later, the King, (who inspired his country's stern resistance during bitter years of occupation), welcomed the Queen and her husband to

Oslo. Oslo became a city of mourning in memory of Norway's first Sovereign for five centuries... Haakon - the most modern and democratic of Kings is succeeded by his son, Olav the Sixth.
