- 2, V.S. On board the Savannah the fire ~~fig~~ fighters in action, the injured are brought out and cared for. 54
- 3, L.S. Through the grey haze the Savannah goes into action again. 20

MUTE AND TRACK NEGATIVES

MUSIC BACKGROUND

OLD LAGS-TRAILER

- 1, V.S. Sequence showing the reasons for lagging hot and cold water pipes, showing you how to lag the pipes also and save coal and also save frozen pipes. 114

MUTE AND TRACK NEGATIVES

NATURAL

COMM.

Ice, coal, pipes. What can they have in common? Watch, a burst pipe through frost. To hot a pipe through wasting fuel. Both could have been avoided by the same means. Lagging your cold water system like this, keeps the frost away and prevents burst pipes. Lagging your hot water system like this, keeps the water hot much longer and you save fuel. Man power is precious. There arn't enough miners, There arn't enough plumbers, but there is lagging and that's ~~what~~ what ice and coal and pipes should have in common.
