**RUSSIA PUSHES ON.**

The Russian power drive still holds the attention of the world. September's headlines come to life with these Soviet pictures, which show the Russian outflanking movement against Bryansk, operating on the German positions.

From Field Headquarters come captured Germans. Prisoners are numbered in hundreds - the dead in thousands.

Bryansk is a City of blazing ruins. Its recapture ended two years of German occupation.

Every ruin is a potential death trap. The Germans had sown their usual harvest of hidden bombs and land mines. With the ultimate entry of the main body of liberating Red Army men the people who stayed on gave vent to their feelings.

The Order of the Day in Bryansk is uncontrolled emotion - and no wonder.
