### FIRE OVER CHINA.

When Jap planes appear over KUNMING the people take to the hills. Fire breaks out, threatening the whole city. Dist of destruction upon which the world is feeding - only the names of places are different. Inadequate fire appliances is only one of their worries. People stand and stare at the hopeless situation and leaking hose connections add to their difficulties. To cap it all the water supply runs short.

Attempts at looting are promptly dealt with. In a few swift minutes KUNMING suffered its worst experience in China's seven years of war.
