AIR AFFAIRS

A U.S. Navy ship demonstrates a novel form of air-sea rescue.

A rubber boat is lowered and then down goes a rescuer....

The aviator who is down in the drink makes for the rubber dingy and the rescuer helps him aboard....A ship of the sky snatching a victim from the sea. The last stage in this operation is a trip by cable up to where it's safer....and drier.

C.A.F. .... The initials of the Chinese Air Force, are formed in the skies during a demonstration of the skill and quality of young Chinese Flyers.

If you read Chinese you'll see this means September the first - the fifteenth anniversary of the Chinese Air Force....'planes in any language spells trouble for the Japs.
