

FRENCH-SPANISH FRONTIER CLOSED

The international bridge at Hendaye, where tension between France and Spain boils. Dividing Hendaye and St. Jean de Luz from Spanish Iran, the French slam the frontier door in France's face. It's zero hour for the last people to cross the border - as they go, anxious relatives watch and wave. When it's over Spain will be sealed off from a world that detests militarism in all its forms. There'll be no work for customs officers when the last trickle of hurrying folk pass over the river into Spain. A new sort of refugees is born - victims of Fascism even in peace. On one side, a free France, on the other, the dregs of a system the war was fought to destroy.
