"NO, NO" SAYS MOLOTOV

Continuing the Paris battle for Peace come the Molotov Cocktails. Determined, unshakeable bargainer, when Molotov says "No", No it is.

Equally plain spoken, reply comes from Australia's Dr. Evatt.

SOUND

DR. EVATT "Mr. Molotov thinks there is some magic in the fraction two thirds. If there is such magic in that fraction the votes 15-6 it is because it is more than two thirds vote". (Applause).

That was a comment on Molotov's insistence on a two thirds majority rule - now another shaft; this time from A.V. Alexander.

ALEXANDER "The extraordinary thing is that Mr. Molotov declaimed that he had the honour to defend unanimity, but by his further argument seemed to infer that there should never be a minority unless it is sponsored by the U.S.S.R."
