

BRITAIN'S FIRST DOUBLE-DECKER DREAM TOWN

We came to a city. It's name - Hastings. Clean streets - modern buildings - traffic well controlled. It is a place where vision and the planners have worked together, where the result is pleasing, futuristic and safe. It is, in short, a model city.

Today it is just a dream - a scale model centred on the town's Memorial. Under it, will be shops, bus stations, subways.

Here is the double-decker town of tomorrow.

Here is Hastings as it is today, centred on the real memorial.

A town with a dream of the future.
