YOUR WEATHER FOR THE HOLIDAYS

35 million Britons will have a holiday this year. They all share the same problem - what will the weather be like? Father's rheumatism provides one never failing answer. But thousands of others aren't so lucky - they are the hopeful amateur weather prophets. To them, it's not a question of depressions and prevailing winds - all they want to know is whether it'll be wet or fine in July and August.

To help you find Britain's proverbial one week summer, our reporter visits the Bartlett Brothers - John and Dennis - a professional weather forecasters. Last October, say the Brothers, they knew all about Winter's cold spell. They are ready to forecast up to 12 months ahead - and they claim they are 80% accurate.
