WORLD AT YOUR ELBOW

To France the flag of the Merchant Navy brings a message of encouragement. Britain is back in the coal exporting business. The Collier Dashwood receives an official welcome from the citizens and city parlours of Rhoen. The first sight of this kind for many years is too much for them. Nearly everyone makes a fete about it, this beautiful British Collier, but not time is wasted in getting it out and nearly everyone in France is aware of the importance of a nations programme of recovery. The first trucks are loaded for the Power stations carrying a freight which signals Britains New Year message. The move toward prosperity is on the way.
