WORLD AT YOUR ELBOW

California -

Their off - 113 hearty cyclists begin the roaring nightmare known as the Pacific Trails Endurance Run. This Californian race is motor cyclings toughest test and shows how to do 400 miles the hard way. Riders can establish a track of 24 miles per hour, riders are penalised if they are too fast or too slow. As for the road, first they curve steep and bumpy then their all wet. If they hit concrete they are wrong, but if they come up like a mud pack they are on the right trail.

Next the cyclists tackle a 5,000ft climb with 365 horseshoe bends. As if daylight riding is not enough the race goes on through the night, when they have finished the boys are left with a permanent shudder.
