In the ship-yard in Gdansk .

72 m.

In the ship-yard in Gdansk new fishing boats made of steel are being constructed. The new steel boat will be ready for launching in a very short time. The engine is taking the boat to the sea-port. Finally the boat has been launched into the water. The ship yard workers are proud of their job.

Our cameraman accompanied the fishermen while they went deep sea fishing. In the beginning it was very romantic, but suddenly the sea became rough. It was necessary for our cameraman to assist the fishermen with their nets. The fishing was very successful. Many fish were caught and the fishermen returned home satisfied.

Holt

At first some of the fishermen thought that the cameraman would bring bad luck, but the opposite was true in this case. Maybe it would be a good idea to take a cameraman along as a mascot.
