COLORADO BEETLE.

..... This is the Colorado beetle

..... And these are ~~his~~ his larvae.....

Together they can destroy this field with potatoes in a short time.

Look here the fatal results.

By millions the colorado-beetles have been washed ashore.

Everyone must know this beetle.

And everywhere people squirt upon the fields with chemicals.

People make experiences with the helicoptere in the Haarlemmermeer on peas-fields for the destruction of plant-louses.

If these experiences have success the helicoptere can render service at the destruction of the colorado beetle.
