

Firemen's Exercises in Milan.

=====

The Fire Brigade of Milan came out in full force to exercise and show what it could do.

We see them carrying their hooked ladders to the building on which the exercise is to be carried out. Then come the leaps from some of the highest windows; some even feel cool enough to take off with angel-dives from that height. Later we see the ladders waving up high with a man perched precariously on the top of each;wonder if it is cool up there;???.they look like very small lollypops on very big sticks.

The exercise went off without a hitch.
