

5582501

X The New Look joins the Navy and the headlines come down. This seersucker summer working uniform is a grey and white pinstripe. These outfits for lady tars, designed by Mainbocher, are practical as well as pretty. For instance, this new rain hood can be stowed after the storm.

X Summer whites feature skirts that are longer and fuller. And navy ~~women~~ women get a break THEIR CIVILIAN SISTERS DON'T! Their New Look won't make present uniforms obsolete for three full years. Hit of the show is the first evening dress uniform in service history -- a three-piece ensemble of navy blue wool and white silk. Yes, the navy women are going to look mighty pretty. But the service plays no favorites. This new evening outfit can't be worn until Navy men get their new dress uniforms, too.

SOMETHING NEW

Birmingham

Out for a test run at Birmingham, a revolutionary design in motor cycles, packing a modified motor-car engine between two wheels.

Leaving its 40-year-old predecessor a mile behind, the "two-wheel-car" has a two-stroke twin-cylinder engine, is shaft-driven and hand-started.

water-cooled, and with engine noise cut to a moderate purr, a new British achievement takes the road.

Rome

Feeding-time at Fur Coat Farm, experimental beaver-breeding station near Rome.

A beaver's life here is short and sad. A pelt one minute; a pelt the next. Nature's most prodigious tailers, beavers multiply rapidly to further the topay-turvy economy of our time. They lose their own skins to give warmth and elegance to women.

Away from the forest streams where they are supreme as architect and dam-builders, beavers take surprisingly to life in a factory of death. What a lovely fur coat you'll make grandma.

Washington

In America, with a parade of new service uniforms for seafaring girls, it's "Join the Navy and wear the New Look."

New outfits for American cousins of the Wrens are practical as well as pretty. This rain hood can be stowed away after the storm.

Summer working-uniforms feature skirts that are fuller and longer. Even if Dame Fashion does change her mind about the New Look these styles stay put for at least three years.

And here's the first full-evening dress in Uncle Sam's Navy - what a recruiting boost - a three-piece ensemble of navy blue wool and white silk.

A few more like this and they'll have granded running away to sea.
