

THE KING GOES HOME

Sandringham - home of the British Monarchy for nearly a century - again claims the nation's interest. To this quiet Norfolk retreat King George comes to complete his convalescence. When he comes to Sandringham, the King indeed comes home. For here he can indulge his deep interest in all that country life has to offer. To the villagers he is not just the monarch, but first and foremost their local squire. From all over the country, crowds make their way to St. Mary Magdalene Church, where for decades Royals have assembled to worship.

His illness prevents the King from attending with his family, but other members join the villagers in the simple act of faith on their first Sunday at Sandringham.

That the King's full recovery will soon come, is the wish of all his peoples.
