

AIR NEWS (#54)

WOLF

The B-36, the world's biggest bomber, takes aboard the world's biggest bomb load: two giant twenty-one-ton blockbusters. The six-engine Convair giant weighs more than three hundred thousand pounds as she takes off from Maroo, California.

With other B-36's she poses for ^{these} ~~the~~ first films of formation flying by the world's most deadly long-necked geese.

The Air Force stages its greatest show to tell Congress and the President where the Air Force money goes. Mr. Truman gets a close look at the

~~xxxxxxx~~ ^{six-jet} B-47 bomber. All the capital's top brass, including

General Ike, is here at Andrews Field, Maryland, as the B-49 flying wing leads off the parade of America's air might.

To catch the world's fastest bomber takes the world's fastest fighter, the F-86.

The President, a forty-eight-group-air-force advocate, sees the Air Force argument for ~~x~~ seventy groups: the speed and variety of modern air power, as sixteen B-36's -- the "intercontinental bombers" -- ring down the curtain on the nation's greatest air show.

General Ike, is here at Andrews Field, Maryland, as the B-49 flying wing leads off the parade of America's air might.

To catch the world's fastest bomber takes the world's fastest fighter, the F-86.

The President, a forty-eight-group-air-force advocate, sees the Air Force argument for ~~x~~ seventy groups: the speed and variety of modern air power, as sixteen B-36's -- the "intercontinental bombers" -- ring down the curtain on the nation's greatest air show.

HANGAR

WEIST

WOLF

A Navy veteran, one of the biggest wooden hangars ever built, heads
 for retirement at Houma, Louisiana. Workmen place the last of ^{the} two
 thousand sticks of dynamite necessary to demolish the giant structure
 which housed three coast patrol blimps during the war. ~~The thousand-foot~~
Now it's hanger ~~has~~ outlived its usefulness, so . . .

Twelve million pounds of lumber head for postwar housing.
