### PARIS STOCKING FASHIONS

Every summer the Paris designers arrange to go haywire - it's probably the heat that does it. Now we know why husbands drink arsenic - it's the old lace.

This pair looks as though it's been through a puddle - but no, those splashes are flowers.

Don't look now, but there's a zebra in the show. This one's a beach-outfit....wearing of shoes, optional.

What have they got in headgear? Here's a hat you can wear as a coat - and conversely, a coat you can wear as a hat.

And so to the highlight of the show - something for the hardworked housewife - mop and slippers. In future men will say: "Darling, I worship the very ground your feet polish."
