LIGHTNING

BARUCH

WOLF

X In Pittsfield, Massachusetts, General Electric opens a new high voltage engineering lab. Electricity built up in ~~large~~ impulse generators sixty feet high is discharged through ~~these~~ electrodes. Now engineers prepare the greatest ~~artificial~~ shocker in history -- fifteen million volts of man-made lightning.

X This is no mere Fourth of July fireworks. The harnessed lightning is hurled against of model community. Engineers study its effects. When lightning struck twenty-five years ago (PAUSE) the community was in trouble.

Because of In labs like this,  
 thanks to knowledge gained ~~through~~ lightning when lightning strikes today (PAUSE) ~~it's~~ it's harmlessly grounded. ~~Through~~

Now, through new research, you'll be safer than ever when lightning strikes
