CAMPBELL II OUT TO BREAK SPEED RECORD

Donald Campbell takes on a family heritage. In Bluebird - the late Sir Malcolm's famed speedboat - Donald hopes to break his father's world record. Lighter and slightly modified in design, Bluebird has lost its jet engine and has been refitted with the identical Rolls Royce engine that won Sir Malcolm his land speed record, 14 years ago. A war-time fighter pilot, Donald - here with his wife Euphine - thinks that this new Bluebird can beat a recently issued challenge by that fabulous American, Henry Kaiser. Supported by his father's old team of mechanics - 28 year old Campbell Jr. hopes to make his record attempt in early August. The Campbells are a race of fighters.
