TUNNIES

The tunny fishery is an old well known industry of Sicily, which contributes to improve the alimentary situation in Italy and the exportation also.

Here is a tunnery near Trapani.

The capture of the tunnies is almost as spectacular as a hunting party. A real fight starts among the boats and the fishes, till at last the beasts are cunningly driven into the last one of the nine net enclosures, where they are killed.

On the spot they are beheaded, skinned and cut into pieces, and finally they find their ultimate settlement in neat cans.
