METEORS REHEARSE AEROBATICS

Meteors of 263 Squadron taxi for the take-off, as rehearsals for Farnborough near perfection. Wheels fold almost before they're airborne.

Close-packed as a London traffic jam - it's airmanship at its best.

This hand-picked team of four Meteors takes the air for aerobatics once thought impossible for jet-machines.

Now, a perfectly executed loop. And the earth beneath spins in sympathy.

Practice or performance - it's all one to 263 Squadron.
