

LONDON

NEW IDEAS FOR ROAD TRANSPORT

Giant star of the 15th Commercial Motor Show is the Mighty Antar, Britain's biggest of its type. Designed for a maximum gross laden weight with trailer of up to 100 tons, it's one of 35 that will help to build an oil-pipe-line from Persia to the Mediterranean.

Vehicles of all sorts are on show. In buses we do a big export business all over the world.

Smallest exhibit is the Renault delivery van.

British commercial motor manufacturers will this year turn out 270-thousand vehicles, nearly three times pre-war. Scammell produce this chap who can take the rough with the smooth and still keep a level head. It takes all kinds to make a show and this show shows we can make all kinds.
