BIG VISITOR FOR FESTIVAL

Here's a big load on its way to the Festival of Britain site. It's one of a hundred locos Glasgow is building for the Indian Railways. 80 feet long and weighing nearly 200 tons it travels by road because the wheel-gauge is too broad for British tracks.

There's the Dome of Discovery. Nearly there now. Hello! Somebody's locked his car. It's a case of Heave-Ho and away we go! We're selling big locos like this at about £30,000 each. With an order for a hundred, Glasgow will have an awful lot of saxpenses to bang!
