

BATTERSEA"BIG DIPPER" ON TEST

Festival visitors are going to be taken for a ride! Biggest portable scenic railway in the world, it's having its last check before the first test runs. Fourteen men will check every inch daily when the Big Dipper is open to the public.

The builders take the first of many test runs and along with them goes Pathe's cameraman. For the big climb mechanical hoists ensure safety - and there she goes! A little slowly at first, up the first big climb, just to get you feeling all cozy and then - Whoosh! Stomach, where are you?

There are eight dips in the three-quarter-mile run - three of 'em real big 'uns - and on the opening day Princess Margaret is expected to try 'em out.

If your tummy gives you any trouble at home, come here and get your own back!
