FOR DUBLIN REEL ONLY

TURIN MOTOR SHOW

President Einaudi hears Signer Togni outline new government policy for the Italian motor industry when he comes to open Turin's 33rd Motor Show. A five-acre car park houses the show. Among the 400 exhibitors from seven nations, America shows 20 different makes, some of which have interesting novelties.

Alfa Romeo feature a new sports model which promises 185 miles-an-hour.

Not yet on the market is the new Aurelia sports. Also new is the Nardi-Danese 7-50 powered with an air-cooled twin. Another novelty is the English Cooper.

Fiat feature a new 15 hundredweight truck, which claims low consumption with high efficiency.

To the President, chief attraction is the ghost car, which seems to have everything that opens and shuts of its own accord. If it could only drive itself, that really would be motoring de luxe.

OFF THE HEDGE HAT STYLES

In Honolulu the flowers that bloom in the Spring can make a good job of your face! They're picking them here, there and everywhere and turning them into lovely creations like this confection of carnations and orchids, that wouldn't get the bird anywhere.

With Hawaii's almost endless variety of flowers to choose from, it's a great idea. But there's one snag for husbands. On top of the usual wait, you'd have to add extra time while the darlings make themselves a hat.

WHILE YOU WAIT

At Kingston, Ontario, instructors of the Canadian Remos can build a jeep whilst you're looking up the next item on the programme. They're Canada's fastest car-assembly team and do this kind of thing for fun. They put on the show in the towns hoping you'll be so keen you'll want to have a go yourself ... and you can, too, if you join up!

Nearly done now. Just pop on the body and we'll beat the clock yet. Three minutes and seven seconds is their latest record. Of course, with the help of a good tree you can break them down again much more quickly.
