TOMORROW'S CAR - TODAY

Le Sabre, the "car of tomorrow" - don't worry if it rains.  
An engineer shows what just one raindrop will do.

Name a gadget, and Le Sabre's got it. Headlights?  
Coming up! Built of aluminium and magnesium, alloy, it's  
powered by a 300-horse-power V-8 engine with supercharger.  
Now all we need is roads of the future.

NEWS -2-

of his nation: French and Flemish, the oath which makes him in name as well as fact Baudouin, first -- King of the Belgians.

The tomorrow

~~At Milford, Michigan, General Motors unveils its "car of the future," -- makes its bow. It's Le Sabre. In the future, you won't need to worry about rain when you if it rains. leave your top down. An engineer drops one raindrop to show what'll happen.~~ *If you leave the top down, don't worry about rain when you leave your top down. An engineer drops one raindrop to show what'll happen.*
