AIR NEWS

Brab I takes another step forward on her truly-British slow-but-sure progress to success as the first non-technical passengers board her for a flight over London. She's got a certificate to carry non-fare-paying passengers so we're sending up M.P.s (our most easily expendable load). The Minister of Supply, who's paying Brab's bills, is among those taking the trip.

There she goes ... twelve million pounds worth of her.

O.K., Mr. Strauss? ... That's good! Now for a look-round. If he keeps his eyes on this lot, the engineer's going to be pretty busy. At the controls is the man who first took her up, Bill Pegg.

Will Brab fly non-stop to New York? Or will she cash in on the Paris run? One thing's certain. Brab I has proved that Britain knows how to build 'em!

No. 1 Monday, 30th July, 1931.

Erab I takes another step forward on her truly-British slow-but-sure progress to success as the first non-technical passengers board her for a flight over London. She's got a certificate to carry non-fare-paying passengers so we're sending up M.P.s - our most easily expendable load - including the Minister of Supply, who's paying Erab's bills. *Letting the lip.*

There she goes ... twelve million pounds worth of her ~~in our way~~ ~~at another ... if wonder why stick to the slow-but-sure system!~~

UP

O.K., Mr. Strauss? ... That's good! Now for a look-round. If he keeps his eyes on this lot, the engineer's going to be pretty busy. At the controls is the man who first took her up, Bill Fogg. ~~He answers by her ...~~ ~~and ... are the guinea-pigs,~~ ~~looking down on London.~~

UP.

Will Erab fly non-stop to New York? Or will she cash in on the Paris run? One thing's certain. Erab I has proved that Britain knows how to build 'em!
