TRUCE LINE SIGNED

Red delegates go to the Panmunjom conference for the signing of the agreement with Admiral Joy's U.N. truce team on a cease-fire line. Truce hopes are a little brighter, for the Reds have now proposed inspections by neutral observers. U.N. and Red negotiators put their signatures right on the long disputed line itself. Meanwhile, along the line troops are slowed down by a heavy blanket of snow. Wheels spin and slide. Heavy vehicles are stalled on the roads and need sand under their tyres to get a grip. Winter which bogs us down has (in the past) been the favourite campaign season for the Reds.
