

MR. CHURCHILL BACK FROM U.S.

Just four weeks after he sailed for America, the "Queen Mary" brings Mr. Churchill back to Southampton. In between he has amazed all by the amount of work he has got through. As he looks out on the great Terminal building Mrs. Churchill and daughter Mrs. Soames spot him. Fellow-passengers saw little of the busy Premier, but he's obviously fit again and just as unpredictable as ever.

Mr. Churchill is well pleased with his many talks. Steel, and help with the rearmament bill are two items we've already heard about, but to the newscasts he points out that Parliament must hear his news first.
