

RIDGWAY HERE

At London Airport as General and Mrs. Mathew Ridgway are greeted by Sir John Slessor, Chief of Air Staff, Communist agitators are foiled by security police. Before leaving America, General Ridgway (who is Supreme head of Western Defence) was also made head of all American forces in Europe. His job is to build up the collective defence which we and other Western powers have chosen as our best means of safety. And here's another demonstration about the germ warfare charge which both Britain and America have labelled a lie. Dupes like these prove that Communism does not want peace and any lie will serve to sow distrust.
