MACHINE TOOL GIANTS IN HANOVER

325 manufactures from 13 countries displayed
the most modern precision tools in the 2-European
Machine Tool Exposition.

Here is the German super lathe a French exhibit.

For the first time after the war German heavy
machine tools were again shown to the public; until
1950 their manufacture had been banned by allied
security restrictions based on Potsdam.

And here the giants of the exposition:

A Joe ten planing bench.
