

ATOM MAN'S HUSH-HUSH RETURN

"Top Security." Pathe cameramen and reporter

John Parsons went out under sealed orders to airfield "X" to greet Britain's atomic expert - Dr. Penney - the man with a load of secrets. Precautions were elaborate, but necessary, to ensure that the man who directed the explosion of the British atomic weapon could complete his journey and deliver his eye-witness report to the Prime Minister. Dr. Penney is important, but even more valuable and secret is the atomic equipment tucked away on that R.A.F. plane.

We can tell you now that Dr. Penney landed at Lynnhan, Wiltshire and that he said the atomic test was most successful, but as to what happened in the Monte Belle islands - we'll show you soon in Pathe News.
