

KRUPP'S MILLIONS

The turning point of the war came when the R.A.F. unloaded destruction on the Krupp works in the German Ruhr, crippling German production and destroying the armed might of the enemy.

Emperor of German iron and steel was Alfred Krupp. He was captured by us and handed over to the American authorities in 1946 for trial at Nuremberg.

Twelve years imprisonment and confiscation of property, was the sentence. But the American High Commissioner reconsidered the case and decided that it was unfair for Krupp to be the only war criminal to have his property confiscated. The order was revoked and Alfred Krupp served a reduced sentence of six years and compelled to sell his securities. This will bring him £30 million. Herr Krupp has the last laugh.
