

X The Los Angeles Police Motorcycle Championship Drill Team shows how, if you're speeding, that cop who appears bigger and bigger in your ~~rear~~ <sup>mirror</sup> car's rear ~~mirror~~ seems to come out of no-where. They demonstrate a three-abreast figure eight.

X The drill-master uses two-way radio for instructions and the dare devils come from every-which-way.

THEX This team is the most outstanding unit of its kind in the world, and yet its casualty record is practically nil.

Our cameraman deserves some credit too - these films were not taken with a telescopic lens.

X The instructor calls for "splitting the rail" which calls for non-splitting nerves.
