COMET II - ZURICH TO LONDON.

Once again the name "Comet" makes headlines news. This time its the Comet II, the latest version of the most talked of aircraft in the world, that has sent records tumbling. From Zurich to London in 78 minutes - at an average speed of about 400 miles an hour. Rolls Royce Avon turbo-jets give the Comet II the extra power that can take it nearly half as far again at a higher cruising speed than the Comet I. And we'll be hearing about these aircraft for a long time to come. A bigger, better version - the Comet II - will be making its debut next year.
