

B. I. F. OPENS.

Quality, as always, is the keynote of the 3rd British Industries Fair which has opened in Castle Bromwich. Capable of weighing 200 tons is this British-made spring balance, the largest of its kind in the world.

A new power driving tool. Power pins, either smooth or threaded, are loaded into the gun-shaped tool. A .22 blank cartridge is exploded and the pin is driven into brick, concrete or, as in this case, steel.

This all-British tool is claimed as the most advanced in the world. Machinery to suit every purpose is on show. A tractor with new patent tracks takes an upward journey on a heavy duty lift-truck which can be powered by petrol or diesel fuel. With their other exhibition in London, Britain's industries show the world that their goods are still second to none.
