SEA-BED MEMORIAL.

The scene is Camogli Bay on the Italian Riviera and here, this eight feet high bronze statue, known as the Christ of the Depths, is due to be committed to the waters.

The statue's eight ton base submerges on its way to its final resting place on the sea bed. Its cost was met by subscriptions from all over the world and its submersion after a special mass, was a solemn moment attended by clergy, units of the Italian Navy and many thousands of the faith.

There on the sea bed, the Christ of the Depths will serve as a guardian to all on the sea, and as dedication to all who have lost their lives beneath its waters.
