

OLDEST LOCOMOTIVE

b-180001
54-80

Fuel is extremely cheap for Mr. Galliano's locomotive: some paper and that's enough to make it smoke and go on!

There is everything: wheel, springed seat and a powerful whistle.

The first steps must be made on feet, then it goes by itself on its gun wheels.

It was built 40 years ago and in those times used for "pre-menades!"
