~~NEW TO BEACH DRIVE~~

13/1/55

**A NEW DRIVING TEACHING METHOD ?**

Ciné Journal Swiss

Positive developed 34 meters - II 5 ft

**Driving!** How exciting, even though the car is only on a table. But this one is directed with a real driving wheel, brakes, accelerator and gear, just as on a normal automobile/

On the table streets, with signals, and even cops are reproduced so that the driver can get accustomed to all street-driving embushes. The small automobile reacts to the brakes as well as to the driving wheel.. and the policeman, either a true one, or a faked one, must be obeyed on time..

Any situation that can arise in driving are reproduced here and the expert pilote of this new method of driving teaching, is the inventor of the whole gadget. May be it is the reason why he can manage so well...
