STOCK CARS "DOWN UNDER"

Is there no job too tough for a girl these days? You'd think stock car racing might be one of them, but oh, no! Not for the girls of Windsor, New South Wales, anyway. Men or woman, if you like playing skittles with yourself as one of the ninepins - you're in. And if you're made of indiarubber, you might even stay in.

These battered buggies are specially braced to withstand terrific pounding. What a mix-up! Perhaps my Australian colleague can sort it out. Over to you, Bigger!
