

ENGINEERING IN MINIATURE.

Well, this motor-bike's had a pup - and he's the spittin' image of his dad!

So that's what it is - the Model Engineering Exhibition at Westminster. Here's a model of an Old Great Northern Railway eight-foot single-wheeler, made by Mr. Lock of Woodford Green.

Here's a Great Western pannier tank loco by Mr. Wickes of Hayes, and a working model traction engine by Mr. Sharp of Cockermouth. And this is Mr. Norman Brookes of Ipsden; how did he get that clock into the bottle? Search us!... Now listen to this, by Mr. Smith of Bowley Heath.

And this by Mr. Starck of Brixlip.

And this model pipe organ by Mr. Willotter of Brighton.

Now you across the river, sir? All right, what's the fare? Just the price of a torch battery.

If only everyone would stop looking at him, he'd get this thing going straight!
